SEANNA

To Whom It May Concern,

I can confirm that TheYachtAVIT is currently supporting M/Y Seanna with AVIT systems, network optimisation, and general onboard technical assistance, including ongoing remote support.

During this time, Jake has demonstrated a solid understanding of yacht AVIT environments, particularly in relation to network performance, troubleshooting, and connectivity management. He has resolved various technical issues across onboard systems and contributed to improving overall network stability.

TheYachtAVIT has been proactive, reliable, and easy to work with, integrating well with the crew and supporting day-to-day operations. Jake's methodical approach and practical solutions have been especially beneficial onboard.

Based on our experience, I have no hesitation in recommending TheYachtAVIT for other AVIT and network-related work.

Christopher Pyle

Captain MY SEANNA
