RE: The YachtAVIT – Testimonial – Project S

I am pleased to provide this testimonial for Jake Wyborn of TheYachtAVIT. In my role as Owner's Representative, I engaged Jake as our AVIT and Lighting consultant for the comprehensive refit of a 65-meter motor yacht (Project S).

Jake was commissioned to conduct an independent assessment of existing systems and develop upgrade recommendations for the vessel's AVIT, lighting, and communication infrastructure. Throughout the concept and basic design phases, he collaborated seamlessly with our project team, technical manager, captains, and chief engineer, demonstrating excellent communication and integration skills.

Jake delivered a comprehensive upgrade proposal accompanied by detailed technical specifications and thorough supporting documentation—all presented at a level of detail that enabled shipyards to provide accurate and competitive quotations. His recommendations successfully addressed the client's core requirements for robust, user-friendly, and future-proof systems.

Particularly noteworthy was Jake's ability to structure his proposals across multiple levels of technical detail, ensuring clear understanding for all stakeholders, from technical crew to ownership. His professional approach, technical expertise, and attention to detail made him an invaluable partner in this complex refit project.

I would not hesitate to recommend Jake Wyborn and TheYachtAVIT for similar projects.

Yours sincerely,

Stephen Cartwright
